PROFESSIONAL SUMMARY

Highly motivated and performance-oriented Information Technology Student (Final Year) with hands-on experience in developing scalable full-stack web applications utilizing React and Python (Flask). Confident in my ability to design, develop, and deploy real-world software systems to clients and my own business ventures. Well-versed in software engineering, database systems, and API development, with a passion for problem-solving, system design, and AI engineering..

EDUCATION

Bachelor of Science in Information Technology
KCA University, Nairobi, Kenya
Expected Graduation: 2026

Relevant Coursework:
Data Structures, Software Engineering, Database Management Systems (DBMS)

TECHNICAL SKILLS

Programming Languages:
JAVASCRIPT, PYTHON

Frontend Development:
React.js (Intermediate), HTML5, CSS3, Tailwind CSS

Backend Development:
Flask (Intermediate), RESTful API Design

Database Technologies:
PostgreSQL, MySQL, SQLite

Tools & Technologies:
Git, GitHub, Postman, JWT Authentication

Concepts:
Object-Oriented Programming (OOP), MVC Architecture, System Design

---

PROJECT & PRACTICAL EXPERIENCE

Freelance Web Developer

2024 – Present

- Developed and deployed company websites for real clients, including:
  - https://convenllc.com
  - https://memorableevents.co.ke
- Gathered client requirements and translated them into functional, responsive web solutions
- Delivered user-friendly interfaces and optimized performance for real-world usage

---

Founder & Developer – BnB Safari (Startup Project)

2025 – Present

- Building a full-stack BnB booking platform tailored for the Kenyan market
- Designed and implemented features including user authentication, booking systems, and host dashboards
- Developed backend APIs and structured database systems for scalability
- Integrated business logic for revenue tracking, listing management, and analytics

---

Full-Stack Projects

FreelanceBoard System (Personal OS for Freelancing)

- Designed and built a centralized system to manage freelance projects, tasks, and workflows
- Improved personal productivity and project tracking efficiency

Restaurant POS & Management System

- Developed a system to manage orders, sales, and operational workflows

- Implemented real-time order handling and administrative dashboards

Hotel & Railway Booking Systems

- Built role-based systems with authentication, booking workflows, and admin controls
- Designed scalable backend architecture for handling multiple user roles

Synthetic Indices Trading Bot

- Developed an automated trading bot based on strategy logic
- Applied analytical thinking and algorithmic problem-solving in development

---

LEADERSHIP & INITIATIVE

Startup Founder – BnB Safari

- Leading the development and strategic direction of a scalable booking platform
- Combining technical development with business strategy and product design

---

VOLUNTEER EXPERIENCE

Research Assistant - DHARC, JKUAT
Nyeri County, Kenya

- Participated in household surveys to assess health-related needs
- Collected and analyzed data to support community health initiatives
- Demonstrated teamwork, communication, and community engagement

---

SOFT SKILLS

- Problem-Solving
- Communication
- Leadership
- Teamwork
- Time Management

INTERESTS

- Artificial Intelligence Engineering
- Building Scalable Web Applications
- Tech Entrepreneurship
